

Video Surveillance | AI Warehouse Solution

One unified platform for all IP camera & computer management

Searching for specific info. & video footages is annoying.

Tired eyes on
monitoring, tracking

Disconnected
Systems

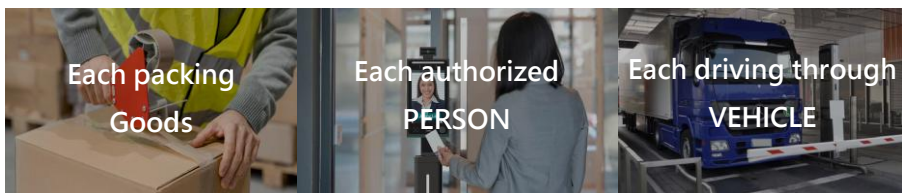

Wrong
shipping item

Dangerous
events

Level up daily operation with organized recorded images

Each packing
Goods

Each authorized
PERSON

Each driving through
VEHICLE

Edge AI box
manages packing, access control, and car parking systems

- Unified Argo AI VMS (video mgt. system) for unlimited camera & computer device management locally or on the cloud
- Enhances the tracking accuracy on packing goods, in & out persons & vehicles
- Instant mail & app notifications of any event, alarm, and disconnected device
- Flexible compatibility with various existing surveillance, access control, AOI, and server systems
- Supports built-in parking system with redundant option, avoiding "shutdown"
- Open VMS API for more integration
- Original-brand support

TEAMMAX Solution Provider | support@tmsi.com.tw (or local partner)

We provide turn-key solutions for private cloud on VM & SDS, edge AI & surveillance, as well as customized Gen AI solution, hardware systems for GPU & storage server, IPC & camera, covering business in Taiwan, Japan, southeast Asia, and more. www.tmsi.com.tw

Features Highlight

AI Analytics for Gas & E Vehicles

1. License Plate Recognition
2. Counting
3. In & Out Recognition
4. Space Occupancy
5. Flame/Smoke Detection
6. E-Charging Recognition

AI Analytics for Persons & Goods

7. Cross-Line Detection
8. Flame/Smoke Detection
9. Restricted Area
10. Intrusion Alarm
11. Loitering Detection
12. Access Control
13. Packing Video Footage

Turn-Key Options

Video Surveillance Set (non-cloud or cloud)

AI-enabled box, camera, intercom, devices, VMS & AI analytics

Optional Packages

VM Fault Tolerance, multi-payment, EV charger, and more

Video Surveillance | AI Warehouse Solution

One unified platform for all IP camera & computer management

Level up daily operation with organized recorded images

Card-type
Thermal imaging camera

Applicable to shelf goods

Gun-type
Thermal imaging camera

Applicable to factory cage trucks

At the same time, the **trusted host and alarm system/broadcast system** of the field are integrated. When an abnormal situation is found, **voice notification** can be issued immediately to provide correct escape instructions. The **access control system** is also integrated to avoid obstruction of the escape route.

How it works

For example, if a fire is detected, the broadcast system can send broadcast content based on the location of the camera that detected the fire source, indicating the safe escape route for personnel.

Turn-Key Options

**Video Surveillance Set
(non-cloud or cloud)**

AI-enabled box, camera, intercom, devices, VMS & AI analytics

Optional Packages

VM Fault Tolerance, High Availability ,
Disaster Recovery
