

TEAMMAX

TEAMMAX HPC MANAGEMENT SERVER

The Teammax HPC Management Server serves as the reliable control plane for high-performance computing clusters. Built on the Gigabyte R133-C11-AAB1 chassis and featuring the powerful AMD EPYC™ 4545P 16-core processor, this robust 1U management node guarantees responsive orchestration and administration. Equipped with 100GbE networking and Gigabyte Server Manager (GSM), it ensures unified oversight across compute environments with maximum uptime.

HARDWARE SPECIFICATIONS

Base Server Platform	1U Form Factor - AMD EPYC 4005 / Ryzen 9000 - 1 GPU - 8x SATA - 2-Port 10GbE + 2-Port 1GbE
Processor	AMD EPYC™ 4545P Processor 16-core, 3.0GHz, 64MB Cache (65W)
Memory	128GB DDR5 DIMM
Storage	2 x 480GB SATA SSD
Network Adapter	1 x 100-Gigabit Ethernet Network Adapter
Power Supply	800W Power Supply
Server Management	Gigabyte Server Manager (GSM) (Included)
Cables Included	2 x IEC320 C13 to C14 Power Cable - 16AWG - 250V/13A - 1ft / 0.3M (TAA Compliant)
Warranty	3 Year Depot Warranty (Return for Repair)
